Data Visualisation Training

(Power BI)

4th to 8th April 2022

Hands on training in workshop form with practical scenario cases!

Akshay Magre

Microsoft Office Specialist Certified (MOS)
10+ years of rich experience

Key Takeaways:

- Design beautiful reports and dashboards for presentation
- Get Insights of data in fast and easy way
- Visualize data using Power View
- Create Advanced visuals in minutes

Highlight:

- Cleaning data using Power Query (ETL tool)
- Work with Advanced cards and Slicers
- Create Maps of different countries and regions

Benefits:

- User having no coding knowledge or any prior knowledge of any tool will have one more tool in his bucket
- 90% of training would be by button clicks , so no coding

Who this course is for:

- Anyone looking to learn Power BI from scratch
- Data analyst migrating from Excel
- Data Scientist moving from Tableau, Qlikview or any other BI Tool
- Anyone looking to pursue career in Data analysis and business Intelligence
- Excel user looking to automate manual daily routine process
- Excel user willing to learn VBA, as this can be best alternative for automation
